Vojtěch Hampl

IT Business Analyst

👤 Profile

Experienced and passionate IT Business Analyst with over 2 years of experience evaluating and improving business systems for well known organizations.

I enjoy thinking about problems and looking for solutions. I dare say that my strengths include determination, diligence and perseverance, which I have taken over from my career as a professional sport. Gaining experience, I acquired communication, organizational skills, a sense of order and diligence, adaptation, flexibility and quick problem solving.

I master modeling in EA (Enterprise Architect) and use UML, BPMN, Soa(SOAP, REST API) notations. I won't be scared if I get my hands on json, XML, XSD, or WSDL. I am calling the service in SoapUI to verify the results of service calls and I do not oppose the accumulation of additional technical knowledge.

💼 Employment History

IT analyst v Vojtěch Hampl

leden 2023 — současnost
